

## Integrated Information Technology Ingenuity Integration Across Technologies & Approaches - Enabling Solutions for Science, Technology, & Research Innovation

**New Insight Through  
Transformation of Information  
Delivery**

New Light Technologies Inc. (NLT), a small business based in Washington DC, provides comprehensive information technology solutions for clients in government, commercial, and non-profit sectors. NLT specializes in DevOps enterprise-scale systems integration, development, management, and staffing and offers a unique range of capabilities from Infrastructure Modernization and Cloud Computing to Big Data Analytics, Geospatial Information Systems, and the Development of Software and Web-based Visualization Platforms.

### Enterprise Information Technology

Trusted architects for DevOps CI/CD, Infrastructure Modernization, Virtualization, Microservices, Cloud, Mobile Computing and beyond.

### Application Development

Leading Agile full stack developers of award winning real-time mission-critical analytics for web and mobile.

### Big Data Analytics & Visualization

Full lifecycle developers of large scale multi-dimensional data and analytical & visualization tools. Collection, integration, modelling, privacy protection, quality assurance & control, and public release.

### Geospatial Information Systems

Leader in enterprise Geospatial platform implementation and management, geospatial data development and modelling, remote sensing, and high performance web-based mapping and visualization solutions.

### Staffing, Project Management, & Training

NLT organizes and deploys teams of talented professionals with highly specialized skills to lead and support a wide range of science, technology, research, and development projects.

NLT's culture of innovation and creativity encourages the integration of technologies, approaches, and fields enabling the firm to lead and support a wide range of science, technology, research, and development projects in public safety & emergency management, telecommunications, healthcare, transportation, urban planning, demographics & economics, environmental studies, and more. Over the years, has developed a stellar reputation for organizing and managing mission oriented multi-disciplinary teams of top technical professionals to deliver results for customers and partners to solve their most difficult science and technology challenges.

**NLT's broad technology expertise enables customers to:**

Take advantage of best in class capabilities

Leverage existing technology investments

Be more integrated, scalable, secure, adaptable, and sustainable

Reduce cost and risk

Meet & exceed mission requirements
