# Integrated Solutions for Complex Global Challenges

## Why NLT

From designing IT solutions for delivering healthcare to building predictive analytics that power the nation's federal disaster response, NLT partners with customers to get the job done. NLT specializes in providing integrated consulting services, in order to help organizations achieve and exceed their mission critical objectives. NLT's broad information technology and scientific expertise and partnerships enable us to incorporate best in class technologies and methodologies from across the industry into our solutions for our customers.

## How We Work

NLT's culture of innovation and creativity encourages the integration of technologies, approaches, and fields enabling the firm to lead and support a wide range of science, technology, research and development projects. We're a team of dedicated technologists, scientists, engineers, designers, and strategists working on some of the most interesting, challenging, and important assignments in the world!
